READ-ONLY / AGGREGATE COUNTS

Retrieved 11 September 2026 at 14:53:25 UTC
Source: live Service Dashboard

VENUES

259 total

247 active · 12 inactive

All venue records. Active means enabled in the dashboard; it does not mean an event is happening there today.

EVENTS

251 next 7 days

32 today · 942 this month

Approved events only, including records with no approval status. The 7-day window includes today and the next six days; the month count covers the full calendar month.

ASSIGNMENTS

567 recorded

236 upcoming events without assignments

Assignment records across all dates, not unique people. The unassigned count covers approved events in the same 7-day window. An assignment does not by itself prove full staffing.

TICKETS

32 open

4 high or critical priority

Open means the ticket is neither resolved nor closed. The high-or-critical count is a subset of open tickets.

MAINTENANCE

870 open

Outstanding maintenance records

Maintenance entries whose status is neither completed nor cancelled. This is a record count, not a count of distinct venues or confirmed equipment failures.

Reading this snapshot: counts reflect stored records at retrieval, not a performance score. Event periods follow the dashboard's date boundary. Totals can change as operations continue.
